

CASE STUDY BROAD CREEK LIBRARY

Norfolk, Virginia

Architect: Tymoff + Moss Architects

Cladding: Aluminum Powder Coated to Match Clear Anodized

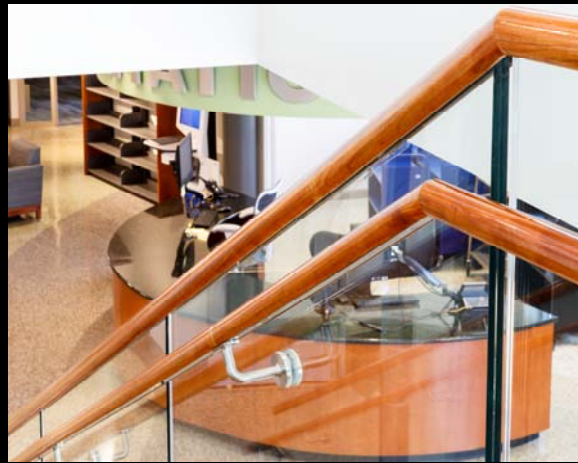

Top Cap: Wood /Cherry

Shoe: Dry Glaze PanelGrip2®

Infill: PVB Laminated Glass 13/16" Thick

The Jordan-Newby Anchor Branch at Broad Creek is the most recent branch in the Norfolk Public Library system, opened June 2018.

One of the highlights of the library is the Newman by Hollaender™ structural glass railing with wood top rail and assist rail. The wood, while expensive, adds a truly sophisticated look to this railing.

The architectural benefit of this type of railing is its openness and transparency.
